

Ryan St. Germaine, Founder & CEO, Indigenous Tech Circle

Ryan St. Germaine is a proud Red River Métis citizen (MMF), with mixed settler family heritage — Ukrainian, British, and Doukhobor. He is Founder and CEO of Indigenous Tech Circle, Canada's largest Indigenous-led tech community, and co-founder of the Indigenous Venture Challenge, which puts real capital behind First Nations, Inuit, and Métis founders. His focus is AI — getting these tools into Indigenous hands early, so our people shape what gets built instead of adapting to it later. Ryan holds board and committee roles with Raven Indigenous Capital Partners, Innovate BC, and the Indigenous Friends Association. He lives in Vancouver.
